DATA VISUALIZATION BLINKIT GROCERY DATA

Pham Tieu Quyen Nguyen

OVERVIEW

Purpose: Analyzed BlinkIT's grocery sales to uncover insights on item performance, outlet types, and customer trends through an interactive dashboard—enabling data-driven decisions.

Tools: Microsoft Excel

Techniques Used:

- Pivot Tables
- Charts and Graphs (Bar Chart, Donut Chart, Line Chart)
- Slicers and Filters for interactivity

IMPLEMENTATION STEPS

Data Cleaning

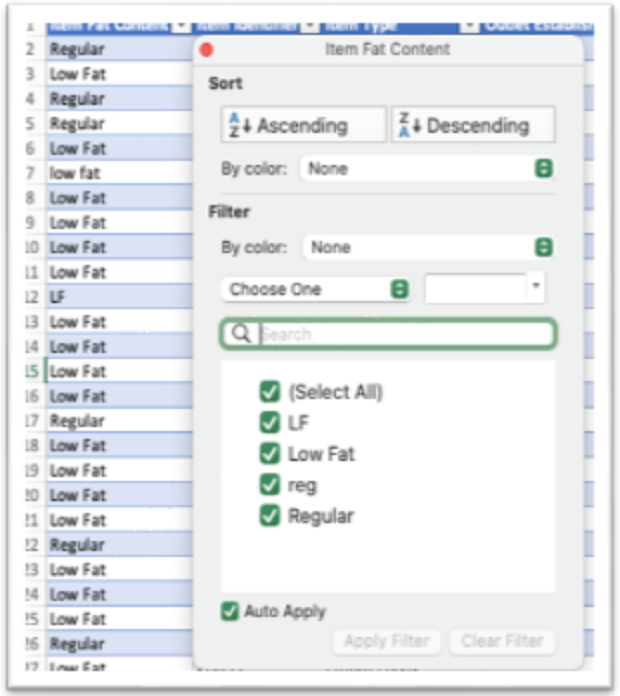
KPI Calculation & Chart Preparation

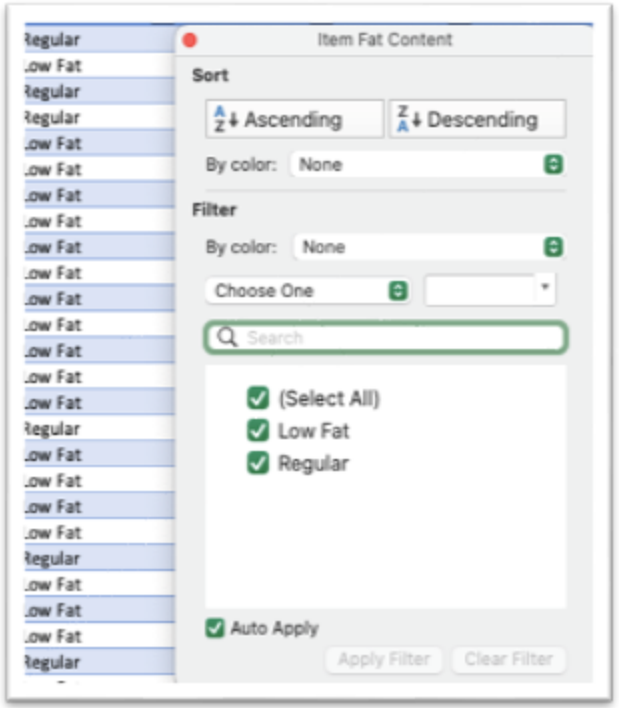
Dashboard Design

DATA CLEANING

Standardized the fat content data: “LF” → “Low Fat”, “reg” → “Regular”

Method Used: Find & Replace





KPI CALCULATION & CHART PREPARATION

Used Pivot Tables to calculate key metrics:

KPI's Requirements			
Sum of Sales	**Average of Sales**	**Number of Items**	**Average of Rating**
1201681.493	140.9927834	8523	3.965857093
Total Sales	**Avg Sales**	**No. of Items**	**Avg. Rating**
$1.20M	$141	8523	4.0

KPI CALCULATION & CHART PREPARATION

Created charts for each analysis requirement:

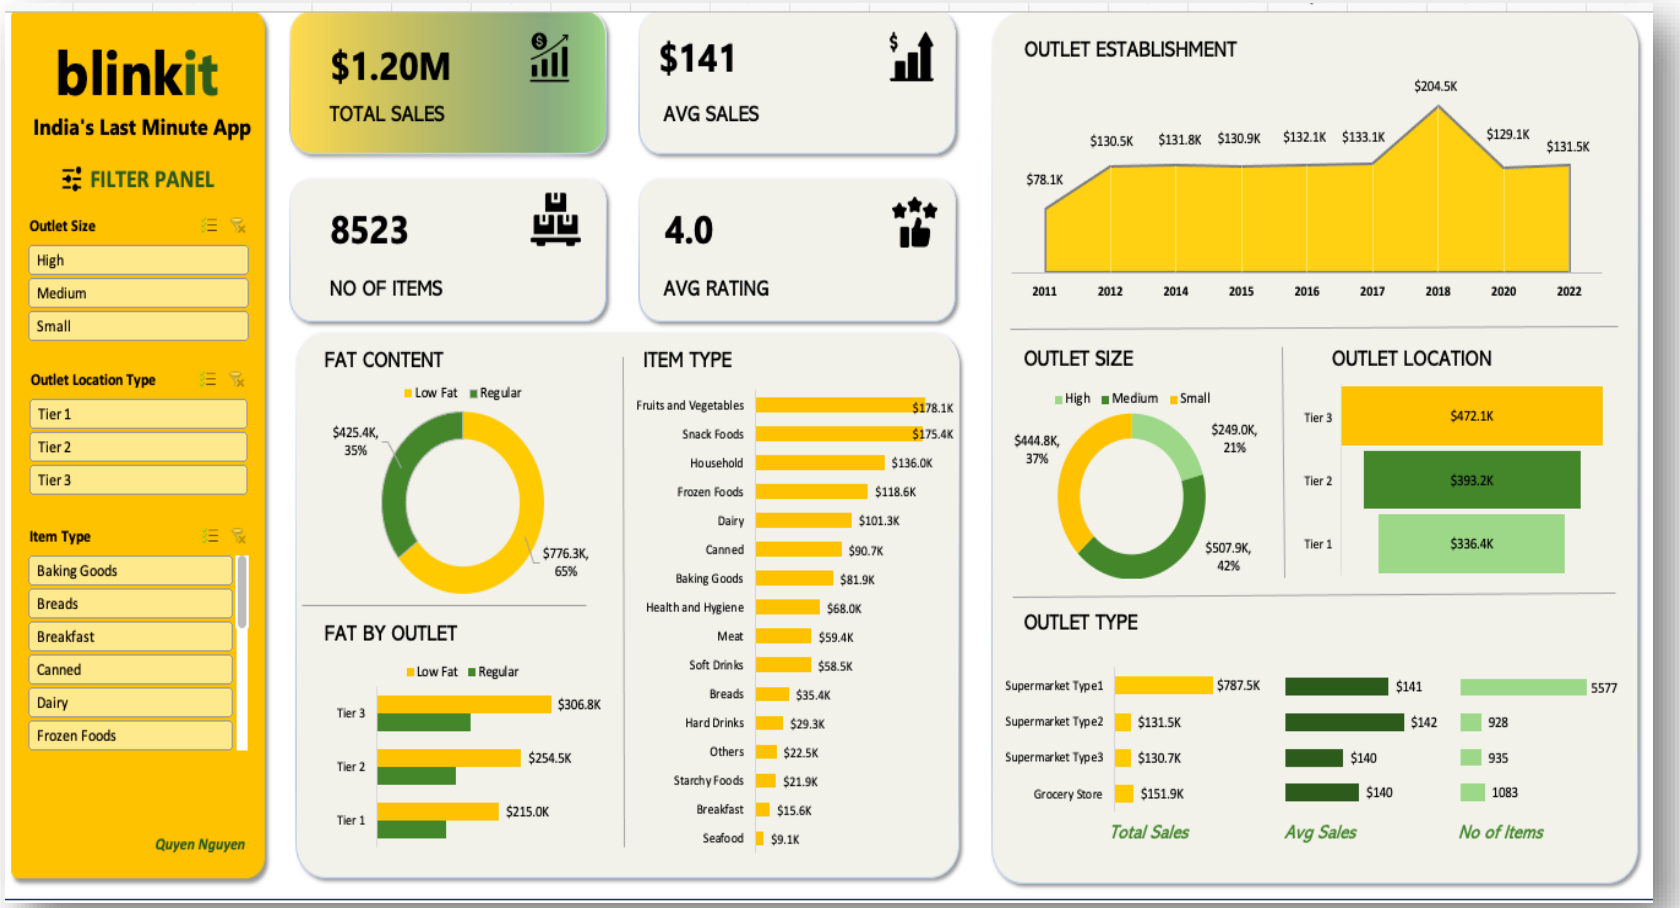
Requirement	Objective	Chart Type
1. Total Sales by Fat Content	Analyze the impact of fat content on total sales.	Donut Chart
2. Total Sales by Item Type	Identify performance of different item categories.	Bar Chart
3. Fat Content by Outlet for Total Sales	Compare total sales across outlets by fat content.	Stacked Column Chart
4. Total Sales by Outlet Establishment	Understand how outlet age/type affects sales.	Line Chart
5. Sales by Outlet Size	Explore the relationship between outlet size and sales.	Donut / Pie Chart
6. Sales by Outlet Location	Assess geographic distribution of sales.	Funnel Map
7. All Metrics by Outlet Type	Provide a comprehensive view of all KPIs by outlet type.	Matrix Card

DASHBOARD DESIGN

Combined all visuals

Included slicers for:

- Outlet Size
- Outlet Location Type
- Item Type



OUTCOME

The final dashboard offers clear, actionable insights into BlinkIT's operations. It enables stakeholders to:

- Understand customer preferences
- Track sales performance by category and outlet
- Make informed decisions regarding product stocking and outlet expansion

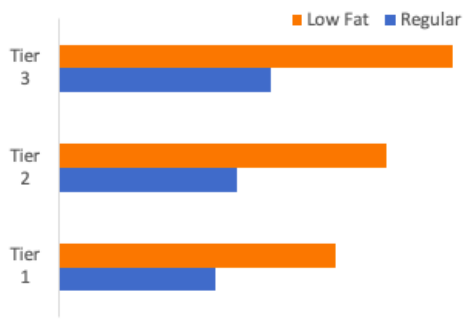
APPENDIX

1. Total Sales by Fat Content

Row Labels	Sum of Sales
Low Fat	$776.3K
Regular	$425.4K

2. Fat Content by Outlet for Total Sales

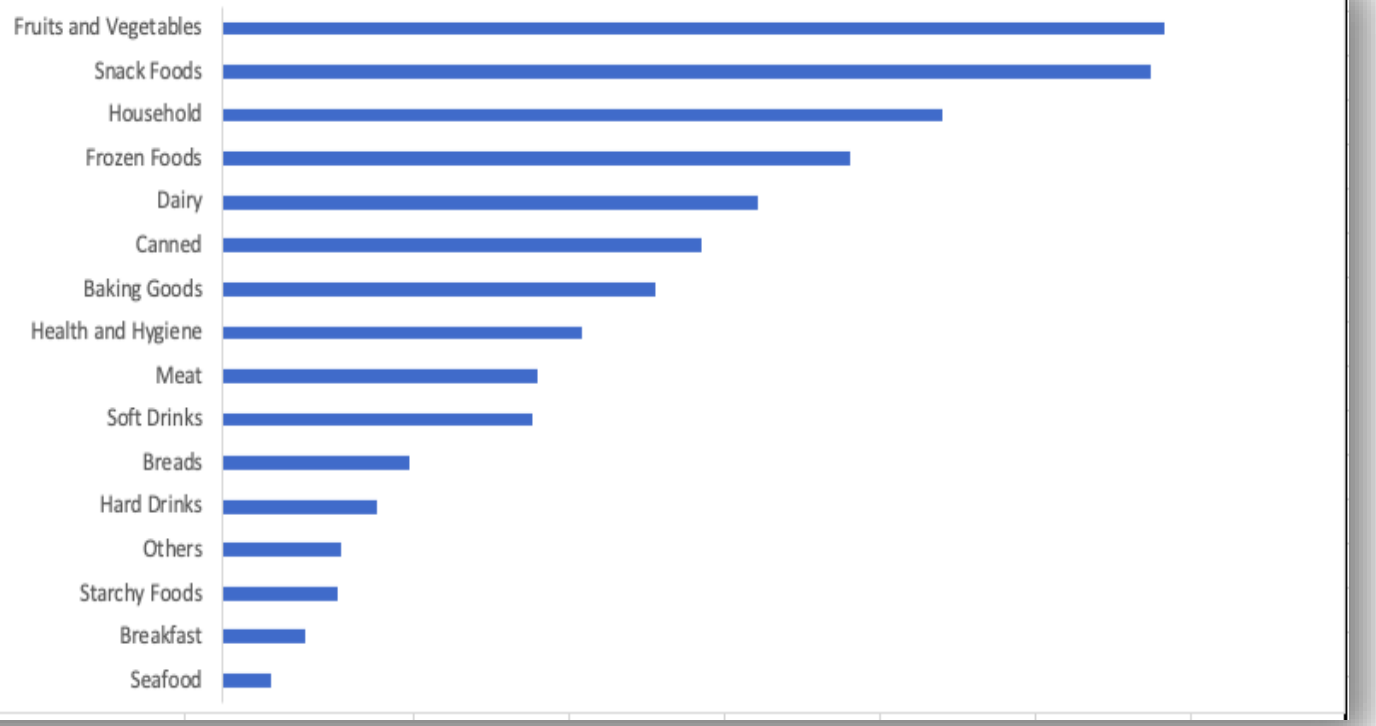
Sum of Sales	Column Labels	
Row Labels	Regular	Low Fat
Tier 1	$121.3K	$215.0K
Tier 2	$138.7K	$254.5K
Tier 3	$165.3K	$306.8K



APPENDIX

3. Total Sales by Item Types

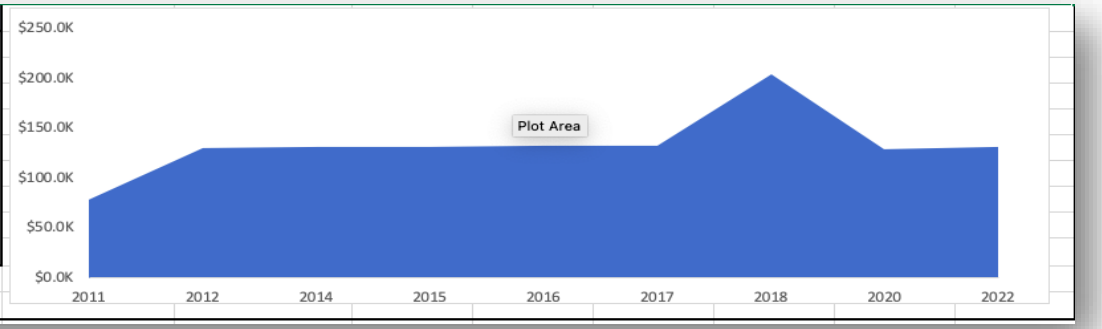
Row Labels	Sum of Sales
Seafood	$9.1K
Breakfast	$15.6K
Starchy Foods	$21.9K
Others	$22.5K
Hard Drinks	$29.3K
Breads	$35.4K
Soft Drinks	$58.5K
Meat	$59.4K
Health and Hygiene	$68.0K
Baking Goods	$81.9K
Canned	$90.7K
Dairy	$101.3K
Frozen Foods	$118.6K
Household	$136.0K
Snack Foods	$175.4K
Fruits and Vegetables	$178.1K



APPENDIX

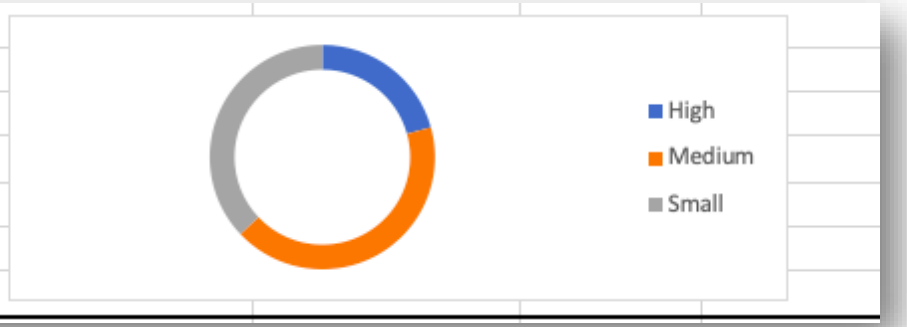
4. Total Sales by Outlet Establishment

Row Labels	Sum of Sales
2011	$78.1K
2012	$130.5K
2014	$131.8K
2015	$130.9K
2016	$132.1K
2017	$133.1K
2018	$204.5K
2020	$129.1K
2022	$131.5K



5. Sales by Outlet Size

Row Labels	Sum of Sales
High	$249.0K
Medium	$507.9K
Small	$444.8K



APPENDIX

6. Sales by Outlet Location

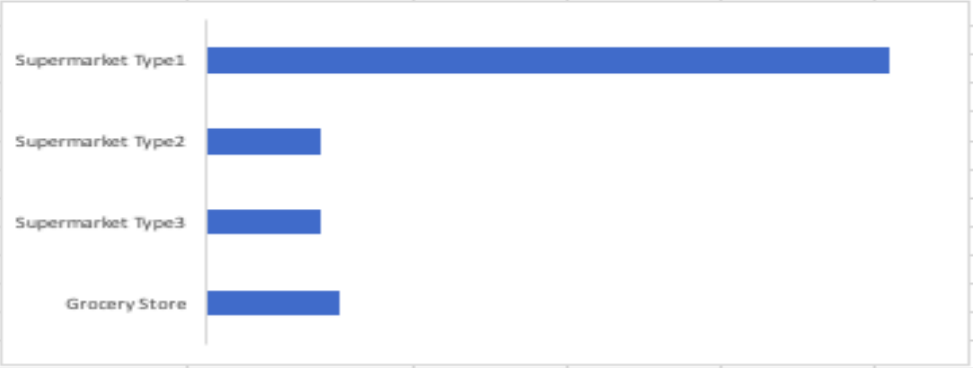
Row Labels	Sum of Sales
Tier 3	$472.1K
Tier 2	$393.2K
Tier 1	$336.4K

Outlet Location	Sales
Tier 3	$472.1K
Tier 2	$393.2K
Tier 1	$336.4K

APPENDIX

7. All Metrics by Outlet Type

Row Labels	Sum of Sales
Grocery Store	$151.9K
Supermarket Type3	$130.7K
Supermarket Type2	$131.5K
Supermarket Type1	$787.5K

Row Labels	Average of Sales
Grocery Store	$140
Supermarket Type3	$140
Supermarket Type2	$142
Supermarket Type1	$141


Row Labels	Count of SR. NO
Grocery Store	1083
Supermarket Type3	935
Supermarket Type2	928
Supermarket Type1	5577
